## **DETAILED ACTION**

### ***Election/Restrictions***

1. This application contains claims directed to two categories of patentably distinct species:

- A. Fatty acids.
- B. Growth factors.

Within category A, there are two patentably distinct species:

- 1. Saturated fatty acids
- 2. Unsaturated fatty acids.

Within category B there are multiple patentably distinct species:

- I. platelet-derived growth factors,
- II. vascular endothelial cell growth factors,
- III. fibroblast growth factors,
- IV. interleukins,
- V. growth hormone,
- VI. insulin,
- VII. insulin-like growth factor-1,
- VIII. insulin-like growth factor-2,
- IX. nerve growth factor,
- X. neurotrophins and
- XI. TGF- $\beta$ .

The species are independent or distinct because each of the members of the categories A and B has different structure, different biochemical and biological properties. The search for all the species disclosed would constitute an undue burden on the Examiner.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. For the response to be fully responsive it should contain one specie from group A (1 or 2) and one specie from group B (I-XI). Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
